†These authors contributed equally to this work.

Abstract

The abstract serves both as a general introduction to the topic and as a brief, non-technical summary of the main results and their implications. Authors are advised to check the author instructions for the journal they are submitting to for word limits and if structural elements like subheadings, citations, or equations are permitted.

Keywords: template, demo

Introduction

The Introduction section, of referenced text [1] expands on the background of the work (some overlap with the Abstract is acceptable). The introduction should not include subheadings.

047 Springer Nature does not impose a strict layout as standard however authors are
048 advised to check the individual requirements for the journal they are planning to sub-
049 mit to as there may be journal-level preferences. When preparing your text please also
050 be aware that some stylistic choices are not supported in full text XML (publication
051 version), including coloured font. These will not be replicated in the typeset article if
052 it is accepted.

053

054 Using this template

055

056 This Quarto template is unofficial and built out of Springer Nature’s template. Some
057 examples of commonly used commands and features are listed below, to help you get
058 started.

059

060 As seen below, you can mix markdown and Latex with each other, though it’s likely
061 best to mostly use markdown.

062

063 Cross Referencing

064

065 To reference a figure with example label “plot”, use `@fig-plot`. Analogously, to refer-
066 ence a table with example label “data”, use `@tbl-data`. To reference a section, such
067 as the Introduction (Section 3), use `@sec-intro`.

068

069 For complete information on cross referencing with Quarto, see [https://quarto.org/d](https://quarto.org/docs/authoring/cross-references.html)
070 [ocs/authoring/cross-references.html](https://quarto.org/docs/authoring/cross-references.html).

071

072 Citations

073

074 Quarto formats citations and references automatically using the bibliography records
075 in your .bib file. For a citation in parentheses use [1]. Multiple citations can be
076 given as [1, 2]. If the tex output is to be included in a submission to a preprint
077 server or publisher, the default citation method, `citeproc`, may not always produce
078 bibliographies compatible with the provided `bst` styles. In this case, you can set
079 `cite-method: natbib`. See [https://quarto.org/docs/authoring/footnotes-and-](https://quarto.org/docs/authoring/footnotes-and-citations.html#sec-biblatex)
080 [citations.html#sec-biblatex](https://quarto.org/docs/authoring/footnotes-and-citations.html#sec-biblatex). In this case, you may need to restrict usage to the
081 default bracketed key citation formats supported by pandoc, such as [1] or [1, 2]. See
082 <https://pandoc.org/MANUAL.html#citation-syntax>.

083

084 Tables and Figures

085

086 To include figures, you can use Quarto syntax.

087

088 For both figures and tables, you can use LaTeX syntax if you need additional
089 customizability.

090

091 For example, to use footnotes within a table, you may want to use LaTeX.

092

093

094

Figure 1: An example figure (an empty plot)

[h]

Table 1: LaTeX caption text

Column 1	Column 2	Column 3	Column 4
row 1	data 1	data 2	data 3
row 2	data 4	data 5 ¹	data 6
row 3	data 7	data 8	data 9 ²
