Cambridge, 2138.

<sup>3</sup>Department of Political Science, Yale University, 115 Prospect Street,  
New Haven, 3401.

\*Corresponding author(s). E-mail(s): [corresponding@email.com](mailto:corresponding@email.com);

<sup>†</sup>These authors contributed equally to this work.

## Abstract

The abstract serves both as a general introduction to the topic and as a brief, non-technical summary of the main results and their implications. Authors are advised to check the author instructions for the journal they are submitting to for word limits and if structural elements like subheadings, citations, or equations are permitted.

**Keywords:** template, demo

## Introduction

The Introduction section, of referenced text Greenwade (1993) expands on the background of the work (some overlap with the Abstract is acceptable). The introduction should not include subheadings.

047 Springer Nature does not impose a strict layout as standard however authors are  
048 advised to check the individual requirements for the journal they are planning to sub-  
049 mit to as there may be journal-level preferences. When preparing your text please also  
050 be aware that some stylistic choices are not supported in full text XML (publication  
051 version), including coloured font. These will not be replicated in the typeset article if  
052 it is accepted.

053

## 054 Using this template

055

056 This Quarto template is unofficial and built out of Springer Nature’s template. Some  
057 examples of commonly used commands and features are listed below, to help you get  
058 started.

059

060 As seen below, you can mix markdown and Latex with each other, though it’s likely  
061 best to mostly use markdown.

062

## 063 Cross Referencing

064

065 To reference a figure with example label “plot”, use `@fig-plot`. Analogously, to refer-  
066 ence a table with example label “data”, use `@tbl-data`. To reference a section, such  
067 as the Introduction (Section 3), use `@sec-intro`.

068

069 For complete information on cross referencing with Quarto, see [https://quarto.org/d](https://quarto.org/docs/authoring/cross-references.html)  
070 [ocs/authoring/cross-references.html](https://quarto.org/docs/authoring/cross-references.html).

070

## 071 Citations

072

073 Quarto formats citations and references automatically using the bibliography records  
074 in your .bib file. For a citation in parentheses use (Greenwade 1993) and for a  
075 text citation: Greenwade (1993). Multiple citations can be given as (Greenwade  
076 1993; Knuth and Bibby 1984). Drop the author like so (1993). If the tex output is  
077 to be included in a submission to a preprint server or publisher, the default cita-  
078 tion method, `citeproc`, may not always produce bibliographies compatible with the  
079 provided `bst` styles. In this case, you can set `cite-method: natbib`. See [https:](https://quarto.org/docs/authoring/footnotes-and-citations.html#sec-biblatex)  
080 [//quarto.org/docs/authoring/footnotes-and-citations.html#sec-biblatex](https://quarto.org/docs/authoring/footnotes-and-citations.html#sec-biblatex). In this  
081 case, you may need to restrict usage to the default bracketed key citation formats sup-  
082 ported by pandoc, such as (Greenwade 1993) or (Greenwade 1993; Knuth and Bibby  
083 1984). See <https://pandoc.org/MANUAL.html#citation-syntax>.

084

## 085 Tables and Figures

086

087 To include figures, you can use Quarto syntax.

088

089 For both figures and tables, you can use LaTeX syntax if you need additional  
090 customizability.

091

092 For example, to use footnotes within a table, you may want to use LaTeX.

**Figure 1:** An example figure (an empty plot)

[h]

**Table 1:** LaTeX caption text

Column 1	Column 2	Column 3	Column 4
row 1	data 1	data 2	data 3
row 2	data 4	data 5 <sup>1</sup>	data 6
row 3	data 7	data 8	data 9 <sup>2</sup>
